# PERFECT SOLUTIONS FOR EVERY ROOF

**ALUMINIUM ROOF DRAINAGE FROM PREFEA**

# PREFA ROOF GUTTERS

## ALUMINIUM SHOWS ITS TRUE COLOURS

The roof gutters can characterise the appearance of a building in two ways. Either they let your façade come perfectly into its own by blending into the overall colour appearance and remaining almost invisible. Or they accentuate it deliberately and with great colour intensity to emphasise the architecture of the building. Whichever version you prefer, with the PREFA roof gutter system made of aluminium, you'll have a world of colours to choose from.

### SIZES:

**25 mm:** Round roof gutters, box gutters

**28 mm:** Round roof gutters

**33 mm:** Round roof gutters, box gutters

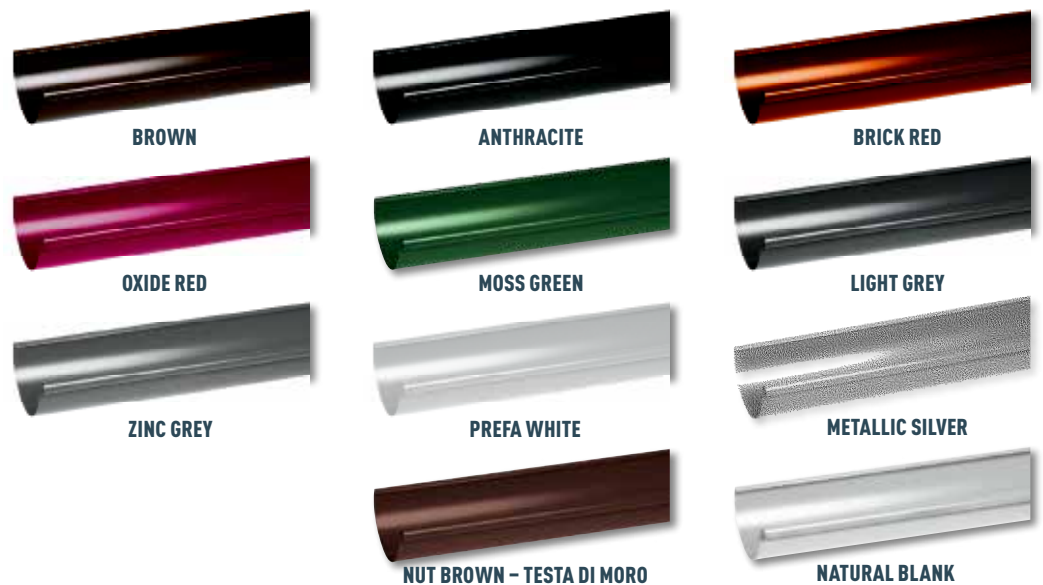

**40 mm:** Round roof gutters, box gutters

**700 x 1.0 mm:** Edge gutter

### **MANY STANDARD COLOURS – AND THE WHOLE RANGE OF COLOURS IF DESIRED**

Using the classic standard colours of the PREFA roof gutter system, you can find harmonious solutions for all common roof and façade colours. If however, the "harmony" is not perfect enough for you, at PREFA you can order your roof gutter system in any of your favourite colours. All parts are made from colour-coated aluminium and result in a unique overall system. Available in four different dimensions, also as box or edge gutters.

### **PERMANENT SPECIAL COATING AND PERFECT FABRICATION**

The PREFA roof gutter system is characterised by its high quality surface finishing, using the Coil-Coating process. This allows the paint coat to remain formable and resistant even under extreme weather conditions. Permanent stability is guaranteed. That is also confirmed by the strict quality checks carried out on a permanent basis by independent institutes.

### **GUARANTEED RUST-FREE AND LOW-MAINTENANCE**

All parts of the PREFA roof gutter system are made of aluminium – a material that cannot rust and that with its innovative surface finish, is perfectly suitable for the creative and functional exterior architecture of your building. Even unpleasant maintenance work, such as refinishing and applying another coat of paint, are no issue at all with the aluminium roof gutter system from PREFA – guaranteed.

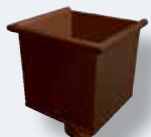

### **ALUMINIUM PROTECTS THE ENVIRONMENT**

Even for ecological reasons, the PREFA roof gutter systems made from aluminium are the best choice. The material aluminium does not release any harmful heavy metals that can access the waste water system from conventional materials by continuously washing the gutters and pipes with rain water. Moreover, aluminium can be recycled 100%!
